Attention: Mr Vincent Houle, Engineering & Quality Assurance Manager.

REVISED QUALIFICATION STATUS

Dear Sir:

Pratt & Whitney Canada has qualified you for the following process:

- | | |
|---------------------------------------|---|
| Heat treatment
(Non Rotor) | CPW 21-17, -22, -23, -24, -26, -29, -31, -32, -33,
-34, -57 & -73
(Controlling Document F-40) |
| Heat treatment
(Non Rotor) | Gaseous Nitrocarburizing AMS 2757.
(Controlling Document F-40) |
| Heat treatment
(Non Rotor) | Gaseous Nitriding AMS 2759/6.
(Controlling Document F-40) |

The purpose of this revised qualification is to change your vendor code from 702298 to 721405. Also, your AMS2757 and AMS2759/6 qualification which were previously covered under CPW21-73 are now explicitly listed.

F sections of the P&WC Material Control Laboratory Manual establish controls for chemical and metallurgical processing performed by P&WC qualified sources. Compliance with these controls and applicable specifications is necessary for continued qualification.

Continuance of the qualification also depends on maintaining facilities, procedures, and controls to P&WC standards, as determined by our periodic surveys and on our routine testing of your product. Qualifications for materials and processes not used on P&WC parts for one year may be discontinued at the discretion of P&WC.

This letter supersedes all previous qualification letters.

Please notify Philippe Lapointe by email Philippe.Lapointe@pwc.ca of any changes in personnel, address or required updates to qualification status.

Yours truly,

PRATT & WHITNEY CANADA INC.
